## BARRIER SKIN CREAM

### The Original Barrier Skin Cream— Accept No Impersonators.

SaniGuard® Barrier Skin Cream is a tested, high-powered, anti cross-infectant, and skin protectant. It bonds with the outermost “stratum corneum” layer of the skin’s paper-thin epidermis, which is composed of dead epithelial cells joined together as “cellular plates” with “cellular glue.”

When applied to the skin, the Barrier Skin Cream’s ingredients interact and bond with these cells to form a waterproof, complex polymeric “second skin.” Our formula works both mechanically and chemically to prevent the intrusion and spread of most harmful substances.

The protective film contains minuscule “breathing holes”—smaller than the smallest HIV virus, but large enough to allow the skin to breath and perspire normally. Yet, most pathogens and caustic chemicals simply cannot penetrate. Just as important, the Barrier Skin Cream’s defensive shield inhibits the further spread of infection “a contamination trail,” into the workplace and beyond.

#### Benefits of Using SaniGuard® Barrier Skin Cream:

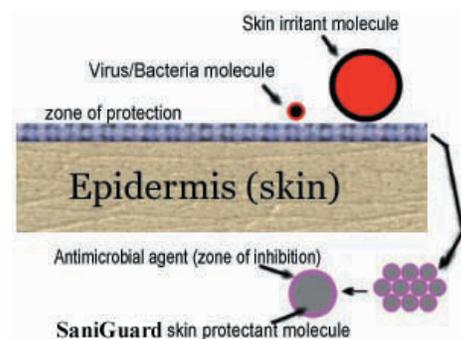

- Antibacterial and Anti-fungal Protectant Lotion\*\*
- One Application Lasts Up To 3 to 4 Hours
- Fortified With the Exclusive SaniGuard Complex
- Tested in Approved Labs\*
- 99.99% Effective in Bacteria, Virus, and Fungal Tests
- Special Ingredients Promote Soft and Healthy Skin
- Dries Completely

#### SaniGuard® Barrier Skin Cream Repels:

- Grease
- Dyes
- Mild Chemicals
- Poison Ivy/Oak
- Paint
- Water

#### Ingredients that can be added:

- Sunscreen
- Insect Repellent (i.e. Mosquitoes)

Manufactured by DEM Technology · Dayton, OH 45408 · (937) 223-1317
